SUMMARY

Software engineer with production experience building RESTful APIs, machine learning systems, and data-driven applications using Python, C#, and PostgreSQL. Strong foundation in cloud infrastructure, ORM-based design, and full-stack development.

TECHNICAL SKILLS

Languages: Python, C#, Java, C++, TypeScript, JavaScript, SQL, HTML, CSS

Frameworks: Flask, ASP.NET Core 9, Vue.js 3, PrimeVue, Tailwind CSS

ML & Data: scikit-learn, pandas, NumPy, Random Forest, Feature Engineering, Data Pipelines

Databases & ORM: PostgreSQL, MySQL, Redis, Entity Framework Core, SQLAlchemy, Schema Design

Cloud & DevOps: AWS (S3, EC2, Lambda, RDS), Azure, Docker, NGINX, DigitalOcean, CI/CD

Development: RESTful APIs, Microservices Architecture, Multi-Tenant Systems, Agile/Scrum, Git, Unit Testing

EXPERIENCE

Restaurant Supervisor

Sep 2023 – Present

Hilton Garden Inn • Boulder, CO

- Lead daily operations and supervise team of 8 staff while maintaining 4.5+ star guest ratings alongside full-time computer science coursework

Software Developer Intern (Senior Capstone)

Aug 2025 – Dec 2025

Project CHRONOS – DeNOVO Solutions • Denver, CO

- Led development of financial pricing module for CHRONOS, a labor forecasting platform serving government contractors
- Built RESTful Flask API using SQLAlchemy to calculate composite labor rates including base salary, G&A, fringe, and profit by role and location
- Implemented RBAC-secured endpoints integrating with legacy Labor Forecast APIs for WBS, CLIN, and FTE allocation data
- Generated automated financial reports by WBS, CLIN, and position with FAR-compliant Excel exports

Student Assistant II

Aug 2021 – May 2023

CIRES (Cooperative Institute for Research in Environmental Sciences) • Boulder, CO

- Supported research teams through administrative coordination, front desk management, and structured data organization within a scientific computing environment

Engineering Technician

Jun 2017 – Jun 2020

TSR Solutions, LLC • Lone Tree, CO

- Assembled, tested, and troubleshoot mechanical and electrical systems while maintaining detailed technical documentation in a manufacturing environment

PROJECTS

NFL Game Predictor – Machine Learning Web Application

Python, Flask, scikit-learn, pandas, NumPy

- Built full-stack web application predicting NFL game outcomes using Random Forest (91% test accuracy) with engineered EPA, rushing/passing splits, and sack metrics
- Deployed RESTful Flask API supporting end-to-end ML pipeline from ingestion to model training and deployment

Thaumaturge – Modular ERP Platform

ASP.NET Core 9, Vue.js 3, TypeScript, PostgreSQL, Docker

- Built multi-tenant ERP platform with schema-isolated PostgreSQL databases using Entity Framework Core
- Implemented AES-256 encryption, RBAC authorization, Redis-backed sessions, and Dockerized deployment with NGINX and CI/CD pipelines

EDUCATION

Bachelor of Science in Computer Science

Metropolitan State University of Denver • December 2025 • GPA: 3.85

Coursework: Machine Learning, Cloud Computing, Algorithm Analysis, Operating Systems, Data Structures, Networking

Languages: English (Native), Russian (Native), Spanish (Proficient)
